**PetSafe Radio Fence Systems Extra Receivers**

**The PetSafe Ultra Light Receiver**

**The PetSafe Ultra Light Receiver is used with the Radio Fence Pet Containment System. It includes a receiver, nylon web collar and batteries. The receiver can also be adapted for use with the collar of your choice. The static correction level on this collar falls between levels 2 and 3 on the multi-level collars, with a voltage of 5160.**

**PetSafe In-Ground Radio Fence Stubborn Dog System**

**The PetSafe Stubborn Dog Radio Fence is one of many pet accessories for pets 30 pounds and up. It features the PetSafe Stubborn Dog Receiver, the most powerful receiver available anywhere, with five levels of adjustable correction plus vibration.**

**The vibration feature in the warning tone acts as an additional deterrent. Level one is warning only with vibration - ideal for initial training or very timid pets. Levels two through four with vibration are for easy or average to train pets. Level five with vibration is for very hard to train or stubborn pets.**

**Progressive Correction**

If your pet attempts to leave the yard, the receiver will automatically increase the correction level until your pet returns.

The PetSafe Stubborn Dog Radio Fence comes with anti linger so the dog cannot stay in the warning zone and run down the battery. Levels are easily changed with a push of a button on the receiver. The receiver uses a common 9 volt battery providing an average battery life of 6-9 months. PetSafe Wireless Instant Fence & Radio Fences are ideal for extremely hard to train dogs or dogs that are consistently breaking through boundaries and need a stronger receiver.

The PetSafe Wireless Instant Fence & Radio Fence Testing Tool allows you to test the proper operation of the Receiver and the Low Battery Indicator Light lets you know when the batteries need replacing.

Another advantage of this group of pet accessories is their small and lightweight receivers: The Deluxe Receiver is one of the smallest and lightest receivers available anywhere.

#### **PetSafe Wire & Flags for Radio Fence System**

Looking for more pet accessories? How about 500 feet of boundary wire, 50 boundary flags, and two wire nuts for use with your Pet Safe Radio Fence Pet Containment System? You'll have enough wire to enclose about 1/3 acre.

**Bark Control Collars - Pet Accessories Available Online at PETCO.com**

**PETCO.com has all the bark control collars and pet accessories you need!**

#### **Innotek Free Spirit Automatic No-Bark Control Collars**

Innotek has created a safe, effective way to stop excessive barking. Innotek Bark Control Collars delivers immediate, effective stimulation only when your dog barks. The more he barks, the higher the stimulation. As he learns, the intensity of the stimulation decreases. Choose from rechargeable or replaceable battery styles.

**Premier Gentle Spray Bark Control Pet Training System and Refill**  
Bark control Collar is the simple-to-operate bark deterrent that won't hurt your dog. When your dog barks, a burst of all-natural citronella spray is emitted, which dogs find bothersome to their highly developed olfactory sense of smell.

#### **Innotek Free Spirit Automatic No-Bark Control Collars**

Another safe, effective way to stop excessive barking from Innotek. The self-adjusting unit delivers immediate, effective stimulation only when your dog barks. The more he barks, the higher the stimulation. As he learns, the intensity of the stimulation decreases.

No external programming or controls. Just place it on your pet and it's ready to go to work helping your dog control his unwanted barking. Activated by vibrations from your dog's vocal cords, this unit delivers stimulation only when your dog barks and is not activated by other sounds or the barking of other dogs.

Your kit includes a lightweight receiver, nylon collar, short and long probe contacts for varying coat lengths, battery, and instructions.

#### **How The Free Spirit Automatic No-Bark Collar Works**

Dogs bark. It's one of the natural ways they communicate. However, excessive or pointless barking is annoying to you and your neighbors, and that's where Innotek pet accessories come in.

When used according to instructions, Innotek pet accessories automatically detect barking and discourage it by delivering a brief, harmless electronic stimulation. Since it senses the vibrations produced by the dog's vocal cords, the No-Bark Collar is activated only by the bark of the dog that is wearing the collar.

Unlike other pet accessories, the Free Spirit No-Bark Collar has no awkward switches or dials. Just power it up and put it on your dog according to instructions. That's it. It'll do the rest all by itself. With a little help from your dog, of course.

### **PetSafe Pawz Away Mat for Dogs & Cats**

The PetSafe Pawz Away mat provides an immediate correction when your pet steps onto the surface. Small wires embedded in the mat detect his step, and send a quick burst of energy. The correction is harmless, yet startling, and most pets flee immediately. Pets learn very quickly to avoid the area where Pawz Away is located. Three easy training options allow custom correction to suit the needs of you and your pet:

1. **Tone + Stimulation:** The mat provides a tone and sends immediate static correction when your pet steps onto the mat.
2. **Stimulation Only:** The mat provides an immediate static correction with no audible tone.
3. **Tone Only:** The mat provides a startling tone when our pet steps onto the mat. Pets learn to associate the tone with staying away from the prohibited area.

**Unit includes: Translucent Pawz Away mat, control unit for mat and operating guide. 9V battery is required (not included).**

**The PetSafe Cat Windoor easily installs into your standard size window and safely allows your cat to go outside, and then return home, whenever they please or you can close it to restrict their use.
